

Langstons Life

Welcome

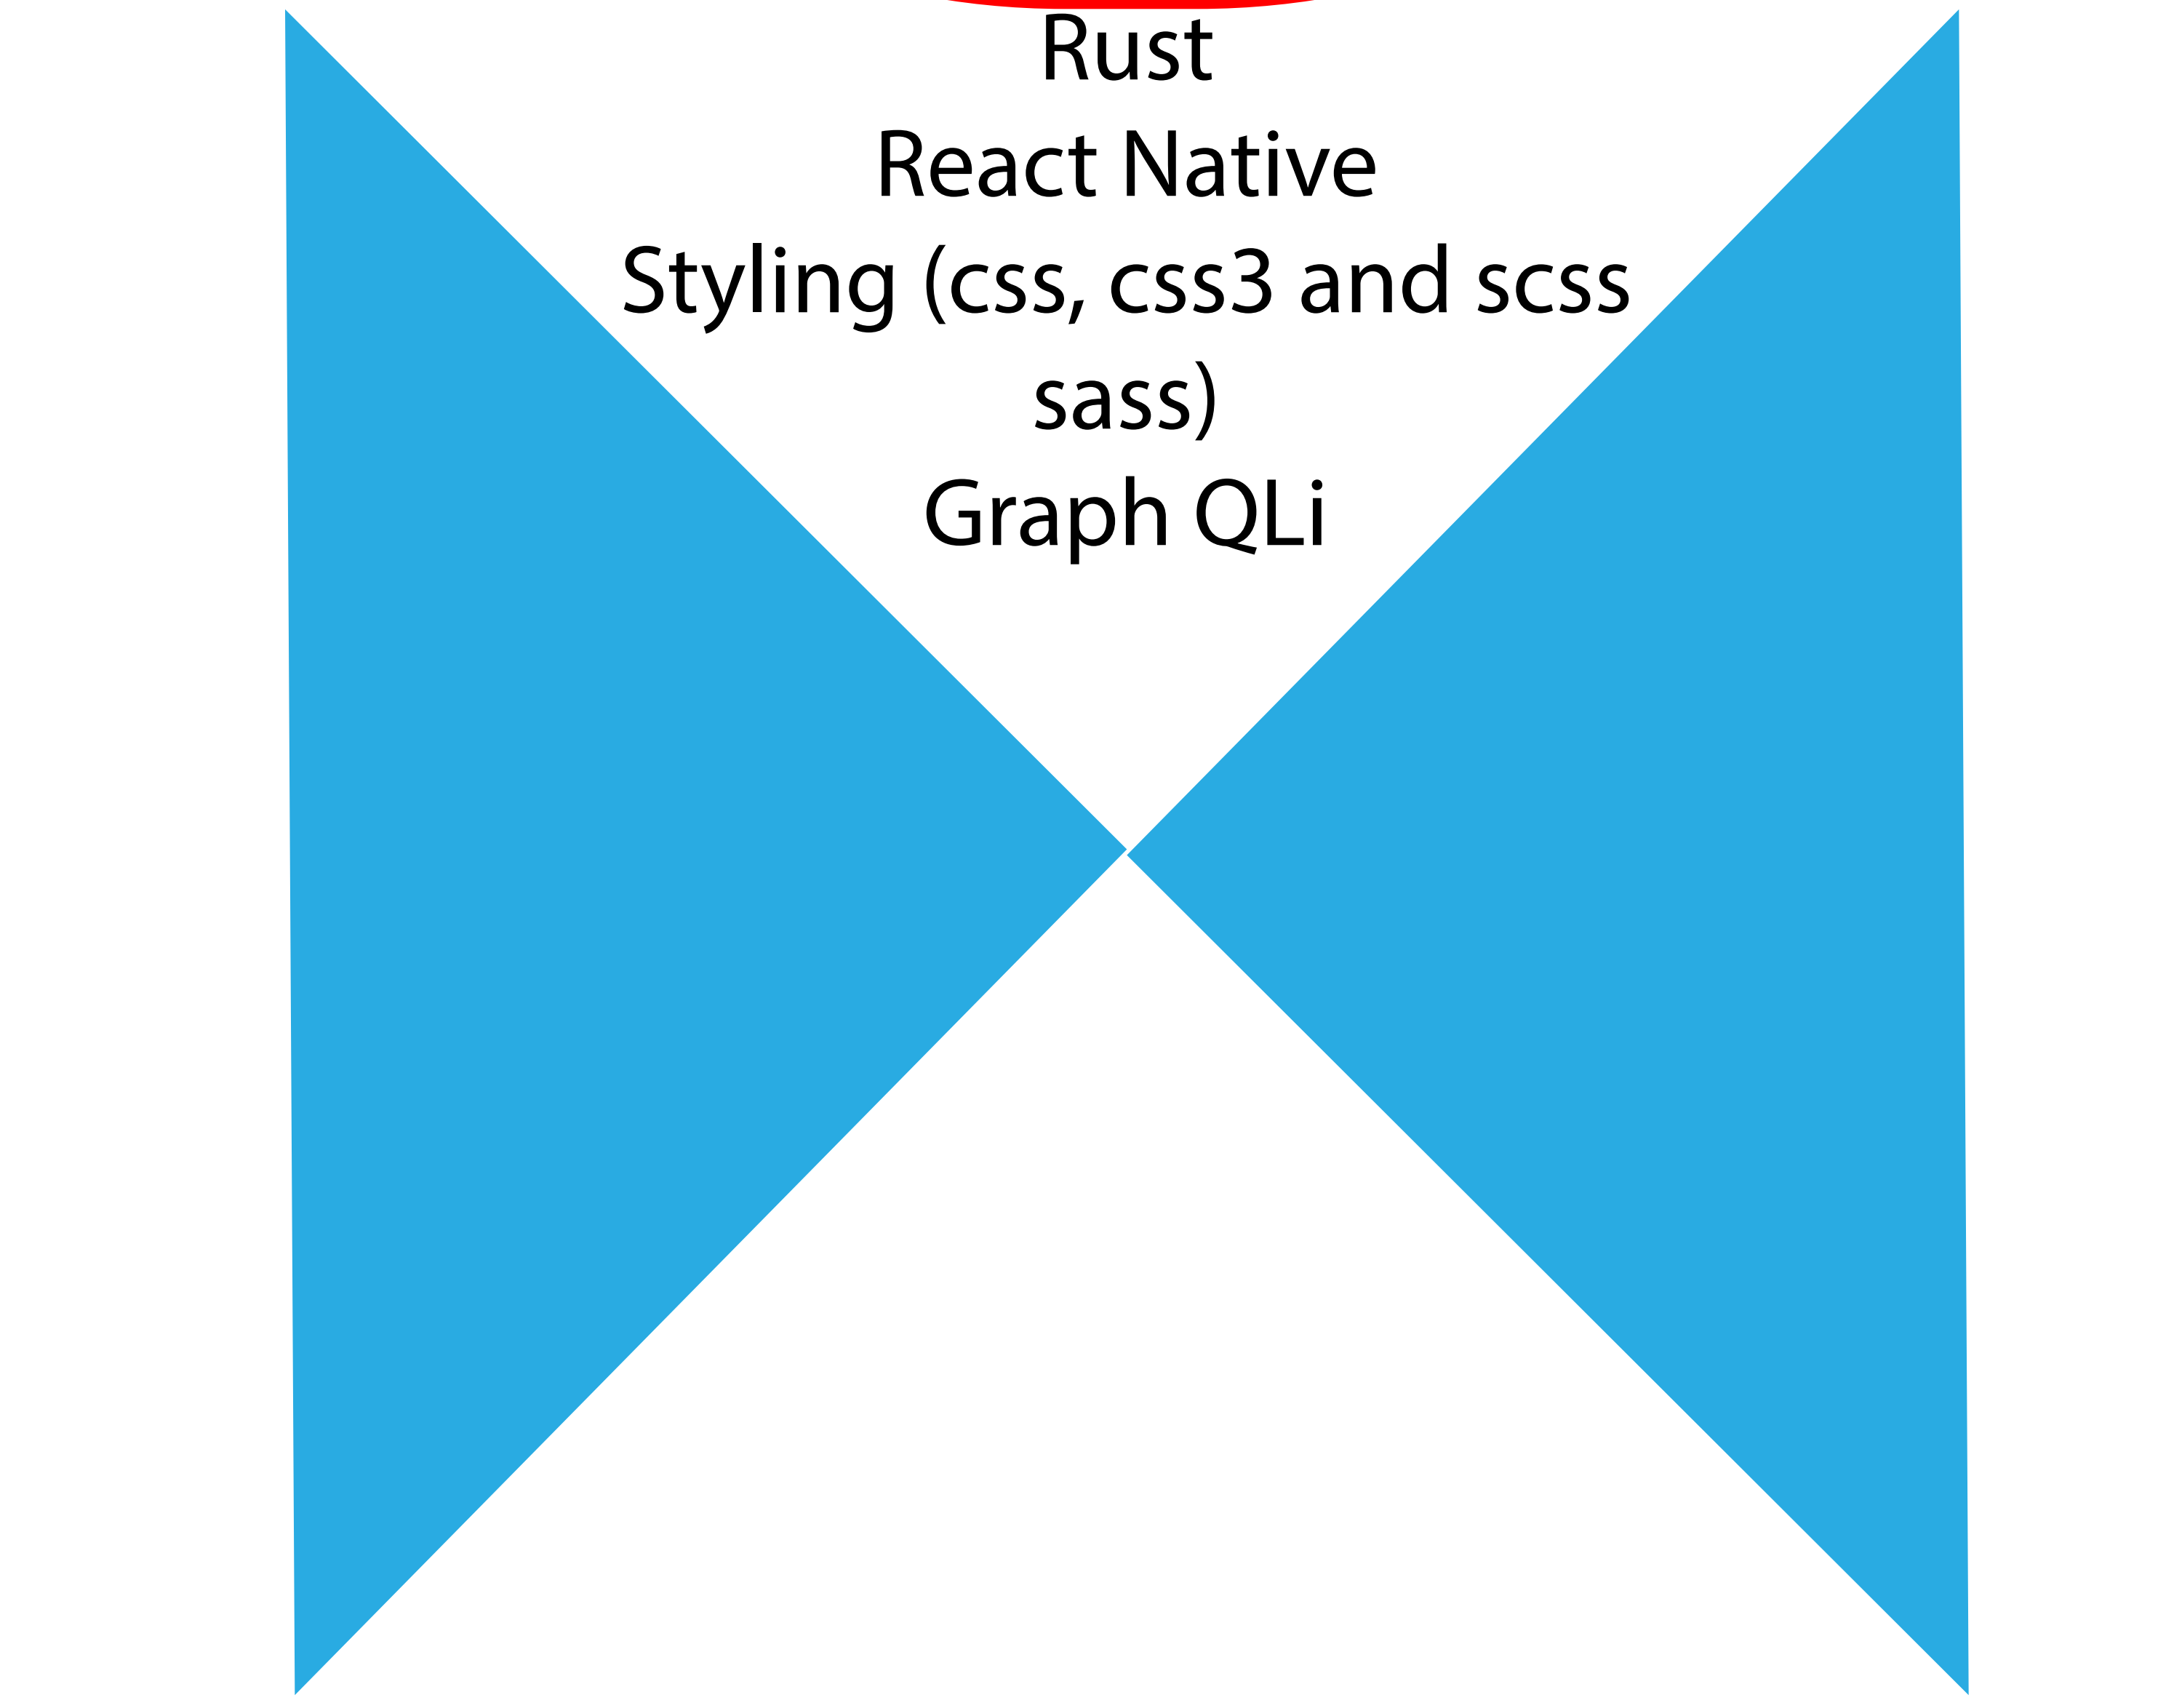

I am a Software Developer who thrives in a collaborative environment working with a dynamic team. I value open communication which supports and empowers everyone on the team to make their fullest contribution. I am empathetic and supportive of my coworkers.

Known Skills

Node.js
MongoDB
Semantic HTML
React
Styling (css, css3 and scss sass)
PostgreSQL

Learning

Rust
React Native
Styling (css, css3 and scss sass)
Graph QL

I have a philosophy that values open communication and community collaboration to solve complex coding problems. Recently I finished a teaching assisting at a dynamic Professional Software Developer Program. I learned how to cultivate a successful learning environment that empowers all voices in the (Zoom) room. I observed firsthand how sustained and progressive success can only be obtained through open community and strong teamwork.
